Documents you can prove

Signed QR binds documents to issuer records.
Check digital integrity and current status separately.
Optional W3C Verifiable Credentials accompany enabled documents.

Controlled issuing and delivery

Approved templates, maker-checker workflows and bulk issuance.
Recipient links, protected viewing and controlled downloads.
Multilingual document workflows.

Signetum SecurePrint

Controlled print allowances and signed print-instance records.
Calibration-led optical watermarks, micro-print and COPY evidence.
Physical effectiveness depends on printer and copier calibration.

Administration and evidence

Organization roles and authenticator-app sign-in.
Tamper-evident audit history and filtered exports.
Company-scoped backups and controlled restore.
